VOLUME 22

CLARESHOLM, ALBERTA, FRIDAY, NOVEMBER 19, 1926

What the whole world knows:

There is only one RED CROSS

Its mission is the same throughout the world

You gave royally in war—
Won't you give royally in peace?

Wherever a sick child is found
Wherever disaster strikes
Wherever the sick and suffering cry for help

THERE IS RED CROSS

It asks your help. Now is the time to give.

HOOT GIBSON

—IN—

"The Man In The Saddle"

Story by Charles Logue

ALSO A GOOD TWO REEL COMEDY

CLARESHOLM LOCAL NEWS

Mrs. Guy and Miss Hood are entertaining on Friday afternoon for Rev. and Mrs. Barlow.

The staff and students of the School of Agriculture are holding the opening dance Friday night, November 19.

Miss Hattie Elverum who underwent an operation at the Holy Cross hospital, Calgary, is reported to be progressing favorably.

Post Office Inspector Stewart was in town last Saturday, checking over the affairs of the local post office, and found everything in first class order.

The Ladies of St. John's Guild intend holding their Xmas bazaar, tea and sale of home cooking in the Parish Hall, Saturday, Dec. 4th, from 3 to 6.

Hoot Gibson, the most popular western film star, at the Rex theater Friday and Saturday night, this week in "The Man in the Saddle." Story by Charles Logue.

Mysterious packages! Even the most discerning eye cannot penetrate their wrappings—but Mrs. Kingsley of St. John's Guild will guide you to success, on Saturday December 4th, in the Parish Hall.

Quite a number of Claresholm people had arranged to motor to Calgary on Thursday to see "The Student Prince," but the blizzard kept most of them at home. One or two motor loads braved the storm.

The Sunshine Club will give their annual oyster supper in the L.O.O.F. Hall on November 26; each club member being privileged to invite four guests. After the banquet the evening will be spent in dancing.

M. L. Phillips and W. A. Brodie, representing the Vitamen Cereal Limited, are in town, and will call on people to explain the merits of this investment. Any one interested can meet these gentlemen at the Queen's Hotel.

Odd Fellows' district meeting was held at Macleod on Wednesday afternoon. A number of the Claresholm members of the order were in attendance. In the evening a banquet was given by the Macleod Odd Fellows, followed by an enjoyable dance.

Mrs. Oliver Mosley will be hostess to the Starline W. L. on Thursday afternoon, November 25th, at a candy-making demonstration. Mrs. Ned Brown demonstrating. Everyone welcome. Come and learn some new Christmas recipes.

The Luther film on Wednesday evening drew a large audience, taxing even the standing capacity of the Rex theater, and judging by the remarks on the street the following morning the pictures were a real treat, and considered one of the most splendid of its kind.

The new engine at the power house was started up Wednesday afternoon and went on the first trial without a hitch. The present expectation is that everything will be in readiness to start the twenty-four hour electric light and power service some time next week.

Wednesday evening snow commenced falling, and before morning a regular blizzard had developed, with the mercury dropping rapidly, to almost zero by Friday morning. No great amount of snow has fallen but what there was of it has been piled into drifts by the high wind.

A. E. Runions will hold a pick-up sale at the Vanhorn livery barn on Saturday afternoon, November 27. There are already listed cows, horses, harness, machinery, Ford truck, and a large quantity of dry goods. List anything you have to sell early with R. L. Moffatt, clerk.

The ladies of the United Church are holding their bazaar and afternoon tea on Saturday, November 20, from 3 till 6 in the L.O.O.F. hall. There will be a home cooking booth where all sorts of good things will be sold. This will also be your opportunity to buy your Christmas presents. A lovely assortment of fancy work and other articles will be shown.

GAS RATE REDUCED

Commencing December 1st, Net Rate Will Be 38 Cents Per Thousand Feet

CALGARY, Nov. 17.—Thirty-eight cents per thousand cubic feet will be the new domestic gas rate for Calgary under the ruling of the Pacific Utility Board's ruling, announced Wednesday. Gas for black and apartment use will cost 25 cents and for industrial purposes 17 cents. These are net prices announced by the Commission, with all communities in the north using gas included.

Mayor Webster and City Solicitor Brockington received a copy of the findings of the commissioners Wednesday and immediately made public the information for which the residents of Calgary have been looking anxiously for weeks.

The new rate is a reduction of 6 cents under the net rate of 44 cents which prevailed and against which the city protested vigorously.

The 38-cent rate comes into effect December 1.

Mayor Webster stated that the Utility Board had, in his opinion, shown a very considerable financial ability in unravelling the complicated threads of gas company finance.

"This order," stated his worship, "I believe, is probably the first order of an utility board on the North American continent made in the last decade providing for a substantial decrease in existing gas rates. This judgment marks a new departure in Utility board jurisdiction."

"According to my present understanding," Mayor Webster added, "the judgment contains within it the germs of future reduction, provides for proper accounting, and for the regular elimination of capitalization. I also note with satisfaction that the city will not be charged with any costs of the application."

Wednesday morning of this week, Mrs. Olive Bean, pastor of our local Church of the Nazarene, arrived home from Lethbridge, where she had been for the last two weeks holding evangelistic services. The services were a pronounced success, and constituted the greatest revival in Lethbridge within the memory of the church people there.

Pastor Holtzen has accepted the call from Trinity Lutheran church in Vancouver. Though he had been asked by his congregation here, at Granum and Pincher Creek to remain in his present parish, he believed that on account of the importance of mission work and the vast opportunities in Vancouver he ought not to decline that position. He will remain in Claresholm until immediately after the Christmas season.

ELKS BANQUET

Claresholm Elks had a big night on Wednesday night, the occasion being an oyster supper put up by the losing side in a lodge contest.

Provincial Grand Treasurer Sam Savage, Dr. Spankie, and other prominent Calgary Elks, and leading Elks from Macleod, Staveland and Granum, were present as guests.

At the close of the banquet Mr. Savage, Dr. Spankie, and others delivered eloquent and witty speeches. Prominent members of Staveland, Granum and Macleod lodges were also called on and responded in well chosen words. Exalted Ruler Fairbairn ably presided as chairman.

Some fine emblematic jewelry was presented to O. Arnestad, and to Mr. Lee of Calgary as tokens of the appreciation of the lodge for the splendid efforts of these brothers in connection with the recent carnival.

The Kiddie Booth

From the dearest of hostesses and hostesses, teddy bears and dolls, to kiddie's tea-cloths and warm woolies, wee party frocks and nightgowns—just the daintiest of everything for the little fairies of the homes—at the Xmas bazaar in Parish Hall, Saturday, December 4th.

A National Literature

Greatness in a nation is to be found in something more than its might as a military or naval power, or in its vast possessions, its financial strength, its industrial development, its worldwide trade and commerce. True greatness is to be found in something more than even the health and physical fitness of its people, their educational attainments, their progressiveness. Real greatness in a nation is to be found in things of a less tangible nature as revealed in the sentiment, the spirit, the inherent character of the people. In these are to be found the soul of a nation.

The nobility of character of a people, the soul of a nation is reflected in its art, its literature, whether of poetry or prose, its attitude towards religious observances, its sympathetic care of the unfortunate and afflicted.

The greatness of Britain is seen just as truly in the works of Shakespeare, Milton, Bunyan, Tennyson, Scott and Burns as it is in the deeds of Nelson, Drake, Wellington, Wolfe or Clive. Indeed, it has been such men as these in the first, middle and latter groups who have been the inspiration of those in the second group. The poets and writers of Britain have nobled the spirit of the races, have caught and aroused the finest and noblest instincts of their fellow men, have lifted high a banner under which Britons the world over have been led to strive with unflinching devotion.

After the passage of centuries the greatness and glory of ancient Greece and Rome rest upon the mighty achievements of their warriors but upon the beauty and power of their great authors, poets and artists.

Their works still live and are an inspiration to the world, while the achievements of the warriors have since crumbled into dust.

A young and still largely undeveloped country like Canada is naturally deeply concerned with material things. It is a country in the line of progress, with a comparatively small population scattered over an immense territory. As a nation it has only recently passed the half century mark. Its history is yet to be made. The years that have passed have been creditable years, and in the brief years of the Great War, Canada proved the worth and character of its people. Great material advancement has been recorded; progress in the national watershed.

But what of the Canada of the future? Are the Canadian people to be content with a form of national greatness based solely on increasing population, greater accumulations of wealth, an enrichment in things material, or do Canadians care for their country, a greatness which will include those other and less tangible, but infinitely more important, things of a fine and lofty literature to guide and inspire generations yet unborn?

We believe Canadians do aspire to these higher things, and this belief is supported by a growing recognition on the part of people of the importance of encouraging the development of a strong and worthwhile Canadian literature. One concrete evidence of this is found in the increasing interest taken in Canadian books, Canadian poetry, Canadian art and music. Canadian authors or Canadian book works have just been observed, and observed more generally than in any previous year. In a strictly material sense the surface idea may be to promote the sale of books by Canadian authors and publishers, but the main, the real, the true purpose is to encourage to Canadian literature, to Canadian writers and poets, and to make possible a Canadian literature which will be a source of national pride, inspiration and strength.

Canada proved its greatness during the Great War not alone in the trenches, or at Viny Ridge, or in the making of munitions, the raising of foodstuffs, the financing of huge undertakings, or in the self-sacrifice of its people. Of all the nations in the world, Canada at the same time prepared the most glorious record of the war by its literature. This Dominion's War Memorial Pictures are without a peer in the world. It is a collection of unsurpassed historical value and beauty, not a glorification of war, but a pictorial history of Canada's contribution to the war effort, the heroism, the steadfastness, the self-sacrifice of our people, and to inspire them to cultivate and maintain those qualities and virtues which make for true national strength and greatness.

And it was a Canadian who produced the finest piece of poetry to have inspired in the Great War—"Colonel McCrae's 'In Flanders Fields'"; a never dying message to the people of Canada to hold on high the torch of freedom and keep the faith for the future.

Every Canadian household should have in it some of the best Canadian books, and the number should be added to yearly and to the extent that the means of the home will permit. It is the waste of our time to neglect the prevalence of our own foreign books and magazines in Canada. There is one sure way to overcome this difficulty, and to promote the healthy growth of Canadian publications and encourage Canadian authors, and that is to encourage the establishment of a small home library of Canadian books and to add to it as rapidly as possible. By so doing every Canadian can help in a very direct way in building up a strong and worthwhile Canadian literature which will prove to be a very real source of national strength.

War On Rheumatism

International Society Has Been Organized to Combat

Rheumatism, one of the world's most common ailments, is now being fought as a war against a common enemy. The International Society for the Study of Rheumatism has been organized for the purpose of co-ordinating the efforts of all those who are interested in the study of this disease. The society is composed of physicians, scientists, and laymen, and its headquarters are in the Netherlands.

This society is about to issue a world-wide questionnaire to collect information about the causes, climate, and social conditions, and other factors that enter into the problem of rheumatism.

W. N. K. 1452

valence of the affection. These data will be used as a basis of scientific study to determine better methods for its treatment and cure.

Plan Unusual Flight

Round the World by Way of Poles Is Latest Idea

A despatch to the Exchange Telegraph from Copenhagen says a round-the-world flight by way of the North and South Poles is being discussed among members of the Scandinavian Polar expedition which flew across the North Pole July 14th in the dirigible Norge.

This statement is credited to Dr. Finn Malmgren, meteorologist and oceanographer on the Polar flight and a close friend of Amundsen.

Dr. Malmgren believes the world flight feasible with an airplane having eight motors, but says the actual plans have not been formulated.

Imitation Was Too Perfect
Louis Anderson, Kansas City, can whistle just like the sirens on a police automobile, but he isn't bragging about it. Recently when he was practicing in a crowded street, a driver drove by him and got out of the way so quickly that he drove over a curbstone and smashed a store window. It cost Anderson \$10.

Minard's Liniment for chapped hands.

Safety Of Railway Travel

Only Small Percentage of Accidents Occur on Canadian Roads

The safety of railway travel in Canada is again shown in a report issued by the Dominion Bureau of Statistics, covering the year 1925. For every billion miles travelled by passengers in that year only 1.7 were killed and 127.5 injured. In other words there were five passengers killed in train accidents in 1925 and 274 injured. The total of 414,584 passengers carried a distance of 2,910,760,417 miles, or one passenger killed for every 83,1 billion miles carried, or one injured out of every 119,600 carried.

Linking Empire By Radio

Project Characterized as Dream Will Soon be Accomplished

The long talked of linking up of the British Empire, a project that has been recently characterized as a dream, is expected to be accomplished within the next few months, with the inauguration of four imperial beam wireless stations in Great Britain. Two of these, at Bodmin and Bridgewater, will communicate with Canada and South Africa, respectively, and two others at Grimsby and Skegness, will span the gap to Australia and India.

THE TRIALS OF MIDDLE-AGE

Much of the Suffering Women Endure Can be Avoided

Every woman approaching middle-age with considerable anxiety, because her life is full of the trials and sufferings to come. She fears loneliness, backaches, lassitude and other ailments which will be hers in the years to come. Much of this suffering can be avoided. This has been proved by the experience of women who have relied at this time on the health-help given by the Williams' Pink Pills. To the middle-aged woman the one thing necessary to carry her through her years of trial is rich red blood. Because of their direct action to the blood, the Williams' Pink Pills are one who are rarely passed by women for women's needs. Among the thousands who have found relief from the troubles of middle age, the name of Mrs. Allan Ward, Echo Lake, Ont., who says: "I was at a critical period in the lives of all my women and was sick and miserable. I came so much run-down that I was unable to do my housework. The least exertion would cause my heart to flutter so violently that I would have to sit down. I had headaches and backaches, and was in a depressed condition. I saw Dr. Williams' Pink Pills recommended and decided to give them a trial. It was fortunate that I did, for the use of this medicine I was restored to good health and I have found it a very good one. I never regreted an opportunity to recommend this remedy to those who are run-down for I am very grateful for what the pills did for me."

Dr. Williams' Pink Pills will be found in all drug stores, or by mail from Dr. Williams' Medicine Company, 233 N. 10th St., Minneapolis, Minn.

Canadian Export Worth

For the past seven crop years Canada's "export worth" has totalled \$75,000,000,000.

Of this, \$10,000,000,000 was in the form of goods, and \$65,000,000,000 in the form of services. The goods were valued at \$10,000,000,000, and the services at \$65,000,000,000.

There are some 230,000 manufacturers and business firms in Canada, and the total value of their output is \$75,000,000,000.

She Laughed!

Thought It Was a Joke

Brooklyn. Mrs. K. Kummer writes: "Please take notice that I can write again. I have been troubled with what I thought Rheumatism. I laughed at someone suggested that try Carter's Little Liver Pills for I never thought that my trouble was anything but a joke. I found out that I am a new person. I think I am now for the help your pills have done for me and my mother. I don't habit forming. Druggists 25 & 50c per package."

Makes Fun Of Food Faddists

Doctor Says More Nonsense Talked About Food Than Anything Else

Speaking in London at the annual dinner of the Institute of Certified Grocers, Sir James Crichton-Briggs said that in the present day food questions were in the ascendant as never before.

The fierce light that used to beat on the store was now concentrated on the grocer's shop. It was scarcely possible to open a newspaper without finding some account of food poisoning, food preservatives, food adulteration, with dietetic recommendations which were sometimes simply foolish and sometimes misleading.

Research work of the right kind was needed, but the deliverances of some so-called research workers must not be swallowed without asking questions. Research conclusions were often partial and provisional, and were sometimes published hurriedly and prematurely.

After all, the most trustworthy laboratory for food research was the human stomach, and its verdicts were not to be lightly set aside. Vitamins were always to the fore, but it was time to differentiate between the vitamins science and vitamin fads.

There was no subject on which more nonsense was talked than that of food. Only the other day an eminent surgeon was inveighing against canned foods. But canned foods were the war.

Let them, as research food, turn out to be the worst of evils, but it is not fair to the killers who would reduce them to mere foodstuffs and to the families who would suffer them with all sorts of rubbish, and follow the dictates of common sense, well established tradition, and a healthy appetite.

As long as they had good, mixed, varied diet they need not bother their heads too much about vitamins.

Great Service To Mankind

If Scientists Can Discover Cause and Prevention of Common Colds

The ambition to "make colds as rare as smallpox" is said to be the moving force behind the proposal of the International Foundation to organize and support extensive and intensive scientific research into the cause and prevention of common colds.

This ambitious yearlies takes an enormous toll in discomfort and in lost time to you for the cold. It is one of the most difficult to guard against is also accepted. But many persons have long left that medical and lay cure alike have long too much inclined to regard colds as inevitable.

The former have not devoted enough attention to prevention or cure and the latter have not realized the dangers and responsibilities of infection.

If, therefore, some organization of a scientific character can undertake an exhaustive study of colds in all their forms, and can find for them the preventive which, unless the latest methods, checking much more dangerous diseases are to be ignored, must exist, it will be doing a great service to mankind, even when colds are so followed by grave illnesses like influenza or pneumonia, they inevitably lower the general resistance to all types of sickness—New York Times.

Big Yields Per Acre

Reports of High Yields for Wheat in Alberta

Reports of high yields of wheat and other grains are being sent from different parts of Alberta to the provincial department of agriculture, from which it is learned that the average yield of wheat in 1925 was 10.5 bushels per acre. In the case of barley, the average yield was 10.5 bushels per acre. In the case of oats, the average yield was 10.5 bushels per acre. In the case of rye, the average yield was 10.5 bushels per acre. In the case of corn, the average yield was 10.5 bushels per acre. In the case of soybeans, the average yield was 10.5 bushels per acre. In the case of clover, the average yield was 10.5 bushels per acre. In the case of alfalfa, the average yield was 10.5 bushels per acre. In the case of timothy, the average yield was 10.5 bushels per acre. In the case of lucerne, the average yield was 10.5 bushels per acre. In the case of vetch, the average yield was 10.5 bushels per acre. In the case of sainfoin, the average yield was 10.5 bushels per acre. In the case of red clover, the average yield was 10.5 bushels per acre. In the case of white clover, the average yield was 10.5 bushels per acre. In the case of yellow clover, the average yield was 10.5 bushels per acre. In the case of black clover, the average yield was 10.5 bushels per acre. In the case of blue clover, the average yield was 10.5 bushels per acre. In the case of green clover, the average yield was 10.5 bushels per acre. In the case of purple clover, the average yield was 10.5 bushels per acre. In the case of pink clover, the average yield was 10.5 bushels per acre. From Dry Areas

The joint arrangement between the Dominion and Provincial governments and the railway companies for the movement of settlers from the dry districts has been extended to June 1st next with the understanding that no certificates will be issued after May 1st but that settlers to whom certificates have been issued will be given until the first of June to move their outfits.

Completing Gravelled Highways

A committee gravelled highway from Edmonton to the international boundary by the end of 1927 is a possibility, according to the program of the provincial highway department. The completion of the gravelled highway from Edmonton to Calgary will be carried out next summer and the completion of the road south from Calgary to the boundary, some of which has already been gravelled will be made next year, too, if possible.

Canadian Pacific Crop Report

WINNIPEG, Man., Nov. 15.—Since the crop report of the Canadian Pacific Agricultural Department, good progress has been made with threshing in each of the Prairie Provinces. In spite of the fact that this fall has been the worst for many years as far as harvesting and threshing weather is concerned, practically all the crop has now been threshed. The condition

of the grain on the whole is very much better than appeared possible after the extended period of wet weather experienced.

In each of the provinces there is a small percentage of grain still in the field, but this should be cleared up in three or four days if the weather is good. In Alberta there are scattered areas of oats and green feed on low lying lands that have not been cut which farmers are planning to pasture off by putting in cattle.

Fall plowing has been completed in numerous districts, but there is still a great deal more to be done, and as the ground in Manitoba, and Saskatchewan is now from hard it is unlikely that much more plowing will be done this year. Alberta farmers are still carrying on their plowing with every likelihood of completing the average intended.

Government to Operate
E. D. & B. C. Railway

In an official statement issued last week, Premier Brownlee announced that the government would take over and operate the Edmonton, Duvergne and B. C. Railway, into the Peace River country, commencing November 11. The operating agreement under which the C.P.R. has been operating the road expired on Nov. 10 under three months' notice given by the government last August.

The announcement was made at the same time that a traffic agreement had been signed by the government with the Canadian National Railway whereby the C.N.R. will handle all traffic from the E.D. and B.C. and for that line, under which agreement the freight rates enjoyed by the residents along the line will be continued. The agreement also provides for the use of the C.N.R. depot and terminals for the trains of both the E.D. and B.C. and the A. and

G.W. lines. John Callaghan, Deputy Minister of Railways, is named general manager of the road.

Under the new conditions, the Alberta Government is sole owner and operator of the E.D. and B.C. and in a position at any time to enter negotiations for an outright sale of the road, should it decide to do so. The latest offer of the C.P.R. for a further lease of the line, which was \$80,000 better than the last previous offer, was rejected by the government, which was opposed to tying up the line under any further agreement, preferring to remain in a position to be free to negotiate the sale of the line if thought desirable. The Premier stated in his official announcement that the government has confidence in the railway department's ability to operate the road at a profit.

LOCAL NEWS ITEMS

For many weeks the ladies of St. John's Guild have been preparing the daintiest of handiwork for your Xmas selection. Their bazaar will be held in the Parish Hall, Saturday, December 4th, from 3 to 6.

Artistic gleanings, woven into delightful Xmas gifts, will be presented for your selection on the French novelty booth, in charge of Mrs. Reinecke, Saturday, December 4th, in the Parish Hall.

The moving picture of the recent Dempsey-Lunney contest for the heavy weight championship of the world will come to the Rex theater on Monday and Tuesday, November 22-23. This is said to be the best fight picture ever filmed. Harry Scott, editor of the sport columns of the Calgary Altarian, says that seeing the picture is better than seeing the fight at the ringside.

Human Flies Scale C.P.R. Chimney

Walking around a two-foot-wide platform that encircled the top of the 218-foot-high chimney at the end of the Windsor street station train platform, Henry Field, of New York, and Richard Bourcier, of Three Rivers, drew many eyes from windows of the C.P.R. offices. The men had been engaged by the company to repaint the bricks, clean the surface and repair the chinking on the huge chimney.

The work of getting the platform to the top of the chimney occupied the men for eight days. Every upward movement of the platform was to a height of six feet and at the last minute of completing this work one of the men would be standing on a single plank, the rest having been raised to the upper position. The fifth work was to the one-lunker dangerous in the air, but the men thought nothing of it.

Asked if he ever suffered from attacks of vertigo, Field laughed

and said he never had. "I feel just as safe up there as I do on the ground," he is a man over sixty years of age and has been doing this kind of work for the past forty years. "I feel right at home on the C.P.R. chimney," he added. "For I built it in 1912." However, he is weary of quitting in another couple of years, although his nerve, as good as ever it was. He owns a half-section of land in Alberta and it is there that he says he will settle down.

Both men moved with the same ease at the precarious height as though they were walking on the street. At times, when heading a plank upwards, one of them stooped over the edge of the platform, looking down the drop of 200 feet, at other times they swung out from the walls of the chimney perched on a tiny cradle. At all times they appeared to have complete mastery of the situation.

Although it took them eight days to hoist the platform to its present position, they glided from it to the ground on a crane in slightly less than a minute.

VITOMEN CEREAL Limited

is the name of this new company organized to profit by the huge quantities of Canadian grain now passing through the port of Vancouver. The company was formed from the Maritime Grain Company Limited, the A. & B. First Avenue Feed, Vancouver, B. C., and the Manitoba Grain Company Ltd. in building for the Vitomen Cereal Limited, as a first unit of their factory, a building 40 feet by 140 feet of solid masonry construction. This building will be located in the Grand Island of the Fraser River from the Manitoba Grain Company Ltd. to Vitomen Cereal Limited. In addition to this Vitomen Cereal Limited will build an elevator and warehouse at later date, plans of which are already out for the purpose of continuing and extending the cereal business of the Manitoba Grain Company Limited. The company owns and controls the right to manufacture and sell in Canada, and in all other food products to be manufactured by it.

The control of Vitomen Cereal Limited is not in the hands of a few people, as 250,000 of our 500,000 shares capitalization will be offered to the Canadian public at the par value of \$1.00 per share. All shares are common, each carrying a vote in the affairs and management of the company and participating equally in the earnings.

A new industry, operating under a Dominion Charter, combining the operation of an Elevator, Grain, Cereal and Feed business with the manufacturing and marketing of an Entirely New Balanced Breakfast Food—an industry with an almost unlimited market and vast possibilities for profit making—the Public is invited to co-operate and share in this great investment opportunity.

Unlimited Potential Market

Vancouver has been selected for the location of the first factory for the manufacture of Vitomen Shreds. The President of the company, Mr. J. W. Lange, is a Vancouver manufacturer of long standing and experience. Mr. G. M. Gidger, Vice-President, formerly of Seattle, has been a cereal manufacturer for many years and experienced in the grain and retail trade. The service of these men are invaluable to the company. Their combined experience should surely bring success to such an undertaking.

Managed By The Right Men

Vitomen Cereal Limited will be controlled and directed by western business men, experienced and successful in the grain trade and the allied manufacture of cereal foods. This is important—it means intelligent, efficient and economical management and substantial profits to the shareholders. The President of the company, Mr. J. W. Lange, is a Vancouver manufacturer of long standing and experience. Mr. G. M. Gidger, Vice-President, formerly of Seattle, has been a cereal manufacturer for many years and experienced in the grain and retail trade. The service of these men are invaluable to the company. Their combined experience should surely bring success to such an undertaking.

VITOMEN SHREDS

THE NEW BALANCED BREAKFAST FOOD

will be one of the chief products of Vitomen Cereal Limited. Vitomen Shreds being a highly nutritious breakfast food that provides a well-balanced diet of all the necessary elements for bodily nourishment. It is a well-established scientific fact that no one meat, grain, vegetable or fruit can supply a sufficient amount of the vital food elements required daily to build up nerves, brain, glands and tissues. The ordinary breakfast food cannot do this. This is where Vitomen Shreds steps in with its scientifically balanced content that forms a complete food by itself. Vitomen Shreds consist of finest whole wheat, celery, lettuce, spinach, alfalfa leaf flour, yeast, butterfat, organic salts and honey. Besides being so highly nourishing, Vitomen Shreds are delightfully appetizing and palatable. In fact, they are the ideal breakfast food, the only one now on the market which forms a complete balanced diet without the addition of other ingredients. Unquestionably such a product only needs judicious and persistent advertising and distribution to give it first place on the breakfast tables of all Canada and the entire British Empire.

First Purely Canadian Breakfast Food

The manufacture of ready-to-serve breakfast foods has never before been attempted in British Columbia, nor in Eastern Canada, except by outside of the great American companies, which have built up huge fortunes for their founders and shareholders. Such vast enterprise in Cereal Limited will become a substantial factor in Canada's industrial life. It will also provide through the payroll of its manufacturing plant a large and constant contribution to the business of the west.

Huge Profits!

are being made by other similar companies, paying enormous dividends to their shareholders. The profits made by the American breakfast food manufacturers are almost unbelievable! Huge fortunes have been amassed and are still being made, as the following figures demonstrate:
\$500 in Kellogg Cereal Co. pays 100 per cent daily
\$500 in Postum Cereal Co. has returned \$125,335
\$500 in Shredded Wheat Co. is worth \$85,000
\$500 in Cream of Wheat Co. is worth \$140,000
The following extract from "Saturday Night" of March 20, 1926, also makes interesting reading:

"SHREDDED WHEAT COMPANY'S INCOME: The Shredded Wheat Company of Canada reported at its annual meeting in Niagara Falls on February 28th a gross income for the year of \$1,827,974. Dividends amounting to \$1,000,000 will be divided among the shareholders. After the present quarter of the financial year is closed every shareholder will receive four shares for his one present share. The company wrote off \$500,000 for goodwill. Although the profits for year were greater than last year, the dividends were lower because of the fact that the new factory was built and equipped out of income."

Agricultural

Research

Results Have Added Huge Bums to the Farming Income of the Country

The value of agricultural research, as carried out at agricultural colleges and experimental farms is seldom fully appreciated. The National Resources Intelligence Service of the Department of the Interior, at Ottawa, the commercial value of Marquis wheat has been widely heralded and undoubtedly it has added millions of dollars annually to Canada's wheat status as a wheat producing country, but it is one of the few instances that have been sufficiently spectacular to catch the public eye.

Agricultural research, by both federal and provincial governments along lines of plant culture and animal breeding, and biology, feeding and so on have undoubtedly added stupendous sums to the farming income of this country, much of this work being done without recognition and without appreciation of its economic benefits.

An excellent example is furnished in a statement recently made by J. Reynolds, president of the Quebec Agricultural Society in particular reference to the work of the Field Experiment Station at Lethbridge.

The one department, according to Mr. Reynolds, has been successful in producing, by hybridization, improved strains of oats, wheat and barley. These improved strains have been broadcast over the Prairies and have caused the farmers to increase the yield per acre in these grains during the last eighteen years over 215,000 bushels. This extra yield per acre has multiplied and in the period of eighteen years thirty colleges in the scale of the Ontario Agricultural College.

Colonel Took No Chances

Story of Miracle Did Not Sound Good To Him.

Canadian newspapers tell how the story of a miracle was told by a man in a court martial. During the Austrian invasion of Italy Italy's army was supposed to have been defeated by a miracle. The story of the miracle was told by a man in a court martial. The story of the miracle was told by a man in a court martial.

The court could not continue to refuse the story offered, as there was general belief in the miracle-working power of the statue. So it referred the matter to the Pope, asking him whether or not a miracle was in the domain of possibility.

The Bishop was perplexed. If the miracle was a miracle, it might be a miracle. If it was a miracle, it might be a miracle. If it was a miracle, it might be a miracle.

The Bishop was perplexed. If the miracle was a miracle, it might be a miracle. If it was a miracle, it might be a miracle. If it was a miracle, it might be a miracle.

Manitoba Butter Scored High

Provinces Win Over Forty-Four Percent of Prices at Various Exhibitions

The dairy industry of Manitoba has made substantial progress during the year 1925 in both quality and production. The production of creamery butter shows an increase of 2,000,000 pounds over 1924 to the end of August. Splendid reports have been received on the quality of the butter in the market, the buyers being entirely satisfied with the quality. Over 2,000,000 six pound boxes have been shipped during the last twelve months since May 15th, a total of 1,100,000 pounds, valued at \$266,168.

The fifty-five creameries in operation in this province will manufacture this year about 16,000,000 pounds of creamery butter. In 1916 the output of creamery butter in Manitoba was 4,200,000 pounds and the production is increasing at the rate of about one million pounds per year. In 1925 Manitoba produced three hundred and forty-two carloads of creamery butter, valued at \$2,416,588. Most of this butter was shipped to the British market. The Agricultural Fair in Brandon, Calmar, Edmonton, Regina, Vancouver, Toronto, New Westminster, Ottawa and Canadian National Exhibition, Victoria, the Province of Manitoba won 44.3 per cent of all the first prizes, and 22.3 per cent of all the second prizes awarded. There are fourteen cheese factories in operation in Manitoba this year, and the total make of cheese will amount to about one million pounds, an increase of about 250,000 over 1924.

Austrian Woman Has School For Birds

Teaches Nutcrackers and Starlings to Talk and Sing

In Austria the starlings and nutcrackers talk and sing, that is, the women who go to school to Mittl Herr. For years Frau Hoyer has been teaching these two varieties of birds to talk and sing. And so successful has she been, that customers flock from all parts of Europe to visit her collection and to buy her birds.

She believes that the ability to sing and talk is a hereditary trait. Consequently she breeds her birds with the greatest care and has developed strains of nutcrackers and starlings which are not equalled as singers and talkers in all Europe.

The starlings and nutcrackers go to school each morning, not just to sing but to talk. The birds sit on her lap and she talks to them, in her lap and as she talks and talks to them. It is pure fun to see the birds.

And her method, patience, an endless amount of it.

When Writing Started

All Words Were Written With Capital Letters

"Capit" in Latin really means a head, and to a chief, and that is what it means to write with capital letters. It is a mark of the chief or most important words in a sentence.

When writing started, all the words were written in the same hand, and as far as our own alphabet was concerned, mostly in what we now call capital letters. Gradually, however, it was found that one could write more quickly by joining up the letters. Next it occurred to us to emphasize the beginnings of important words by writing them in the old manner, and so we got our "capitals."

First Wheat Shipped From West

The first shipment of wheat from Western Canada was made just fifty years ago—comprising 577 bushels, which a price of 52 cents per bushel was received. In 1876 the wheat acreage of Western Canada was 14,000 acres. It seems a far cry from that day to this—with 21,674,788 acres of wheat, and just twelve million bushels of wheat being sold.

The average individual consumption of milk in the United States last year was 1.2 pints a day.

The average individual consumption of milk in the United States last year was 1.2 pints a day.

Peace Bridge Nears Completion

Built Between Britain and U.S. Fought Last Year Along Niagara Frontier

Commemoration of one hundred years of peace between Great Britain and the United States will be celebrated at Buffalo, N.Y., and Fort Erie, Ontario, in the early Summer of 1927 on the completion and opening of the Vehicular Peace Bridge, now under construction across the Niagara River.

Ground was broken at Fort Erie, Ontario, for the construction of this bridge on August 17, 1925, and construction has progressed at a high rate of speed in order that the structure might be opened for travel by the spring of 1927.

On the Canadian side, its terminal will be on the ground over which was fought the battle of Fort Erie, the last conflict waged between England and the United States along the Niagara frontier, in the War of 1812. On the American side, the terminal will be on the land once occupied by the buildings of Fort Porter in Buffalo.

The city of Buffalo has within the past year purchased the Fort Porter property for the Federal Government, and resold a portion of it to the Buffalo and Port Erie Public Bridge Company for terminal grounds. The army post, after occupying these premises for a portion of a century, was abandoned this summer.

The Peace Bridge will be the only vehicular bridge between Niagara Falls and Buffalo. In fact, from Buffalo to the Gulf of St. Lawrence, a distance of 2,000 miles, there are but four vehicular bridges crossing the waters of the Great Lakes system. Two of these bridges are at Niagara Falls, one is at Lewiston, N.Y., and the other at Montreal, Canada. All of these are toll bridges, owned by companies or corporations. Each is, and rightly so, in the nature of a commercial enterprise and so differs materially from the Peace Bridge.

Ultra Violet Rays Produce Vitamines

Certain Foods Exposed to Sun Are Greatly Improved

Sun rays as the housewife's friend, especially in the kitchen, is a new representation of medical science to the everyday woman.

"The housewife will have her home free from the dangerous forms of germ life should let the sun in through the open window," said Dr. William B. Shaw of New York, at a conference on ultra-violet rays. Ultra-violet rays do not penetrate glass, and they are the beneficent rays that destroy bacteria.

Certain foods may be exposed to the sun with profit of another sort, Dr. Shaw added.

"Various foods exposed to ultra-violet rays are rendered vitamins active, possessing effects which they would not be present," he said. Flour, milk and some other foods that are subjected for periods to ultra-violet rays or to the sun's rays, receive derived properties from the radiation which cause them to be more active in the processes of body building."

Other properties of these powerful invisible light rays Dr. Shaw summarized as follows: they penetrate running water and kill it of bacteria; they are subject for periods to ultra-violet rays or to the sun's rays, receive derived properties from the radiation which cause them to be more active in the processes of body building."

A FINE BATHROOM
Modern fixtures have another advantage—they are easier to keep clean than the old-fashioned kind. Those beautiful smooth white surfaces can be kept in a glossy condition with very little care—and there are no difficult corners where only an aerobol could hope to clean successfully. Drop in and see our display of bathroom fixtures.

Autumn Tributes

This month has been fashioned from rich tributes, gathered from the wilds of B. C. the forests of the Southern States and the autumn gardens of Our Lady of the Snows. All have been blended into rich colorings to grace the drawing rooms of distinctive homes. On sale in the Parish Hall, Saturday, December 4th, from 3 to 6.

Mrs. Cornelius
Mrs. McAlpine
of St. John's Guild.

Miss Ina Hummon Motors to Carmangay from Boston

Miss Ina Mae Hummon, formerly in the Claresholm public school teaching staff, who has been attending the Curry school of expression and dramatic art of Boston, Mass., has completed her course and graduated. She returned to her home recently by driving a Ford coupe from Boston to Carmangay, a distance of 3,600 miles in 15 running days, with but very little trouble.

She came by way of Albany, N. Y., Buffalo, Cleveland, Lima, O. to Chicago and Minneapolis then over the Yellowstone through the bad lands of North Dakota to Billings, Mont. thence to Coats Falls, Shelby, Counts to Lathbridge and Carmangay.
Miss Hummon will be at home with her parents for a few months when she will take up her work as instructor of expression and dramatic art some place in the west. Just where she has not definitely decided upon. The plucky motorist's feat deserves her journey home as a wonderful experience, but would not care to make the trip again by herself. The trip from Boston to near Minneapolis was all over concrete paved roads and all were well marked, but from Minneapolis west it was practically all dirt and gravel trail which at this season is only fair for travel. She thinks the automobile associations could well afford to spend some effort to place the Alberta main highways in a better condition by road marking of distances, a great assistance to tourists.

The Red Cross Mandate From the League of Nations

The annual appeal of the Canadian Red Cross is once again before the public, who are asked to express their interest in the humanitarian work of the society in the practical way of joining as members and by contributing money in cash. Although only eight years have passed since Armistice and in spite of the fact that Red Cross has been functioning vigorously by doing the whole of that time there are still some people who have but a hazy idea of what Red Cross is all about, and where the money goes.

The head office of the society has met that need for information in an excellent little pamphlet, which presents concisely the aims and services of the organization.

To quote this leaflet: "Red Cross was not ended when the bugles blew 'Cease Fire' at the Armistice. At the Versailles Conference it was determined that organized Red Cross Societies could give further valuable aid to sick and suffering humanity. In consequence, the Covenant of the League of Nations includes this Article XXV: 'The members of the League agree to encourage and promote the establishment and co-operation of duly authorized voluntary national Red Cross organizations having as purpose: 'The movement of health, the prevention of disease, and the mitigation of suffering throughout the world.'"

The Canadian Red Cross Society is striving to fulfill this obligation and asks the citizens to endorse its efforts by enrolling themselves as members.

CLASSES IN BASKETRY

On Nov. 22 I will open night classes in basketry, consisting of reed and wood-bire work.
Persons wishing to enroll may see me at home in the Lee Altie house.

CANADIAN PACIFIC

The First and Only Direct-Coupled Slow-Speed 700 R.P.M. Radiator-Cooled Electric Lighting Plant

on the Canadian Market is now within the reach of every farmer who values safety, economy, convenience and cleanliness either in the home or in and around his stock barns.

LISTER LIGHT AND POWER SYSTEM is the plant with lots of reserve power. (The small 500-600 Watt outfits are practically useless for power purposes where lighting is required at the same time as power.)

LISTER IS BRITISH BUILT
of 1,500 Watts capacity, using 3 1/2 H.P. Lister Engine—made by a firm with a world-wide reputation of over 100 years' engineering experience.
